Unity Homes, Inc.
307 East Park St.
Enterprise, OR 97828

Dear Mr. Vorderstrasse and Unity Homes Board of Directors,

As the Community Mental Health Program (CMHP), Wallowa Valley Center for Wellness acknowledges the intent of Unity Homes, Inc. to open an Adult Foster Care Home in Wallowa County. We believe there is a growing need in Wallowa County due to our fastest growing population of over 65 years old. The nearest AFH is 76 miles away with little to no access for Wallowa County Residents.

WVCW is able to support residents living in an Adult Foster Home if they are individually enrolled in outpatient behavioral health services with WVCW. In those cases, we would provide the same level of outpatient care we provide to any enrolled client such as therapy, counseling, and ongoing mental health services; delivered in our clinic or via telehealth, based on clinical appropriateness.

We do want to be clear that our service delivery is based on the individual requesting and consenting to care and the location of care is determined based on medical necessity. But the residents would need to request services just like any member in the community, there is not an instant behavioral health package to offer Unity Homes.

Regarding crisis response, WVCW would continue to respond as we do for any community member, according to our regular crisis protocols and availability.

Please let me know if any further clarification would be helpful.

.

Sincerely,

Chantay Jett, CEO
